ABOUT ME

I'm a passionate full-stack developer with a strong background in both web and mobile development. I build modern, responsive web applications using Next.js, TypeScript, TailwindCSS, and JavaScript. On the mobile side, I work with React Native to create smooth and intuitive user experiences. I enjoy working across the stack, from front-end design to backend logic, always aiming to deliver clean, scalable, and high-performance solutions.

TECHNOLOGY STACK

FullStack

- Typescript
- NextJS
- React
- ASP.NET
- React native
- Expo
- Tailwindcss
- Firabase
- MongoDB
- MSSQL
- Node.js
- Express.js

Tools

- Git
- Docker
- Postman
- Grafana

Other

- Websocket
- Web Scrapping
- SSR & SSG
- SEO(Semrush , Google Search Console , Screaming Frog)

ENES KAPLAN

FullStack - Mobile Developer

WORK EXPERIENCE

EKOFIN MOBILE DEVELOPER

06.2024 - PRESENT

- Developed and launched mobile applications on the App Store and Google Play, focusing on intuitive UI and high-quality UX
- Integrated Apple/Google login and payment systems, enabling secure authentication and seamless transactions
- Developed and implemented socket connections for realtime data updates, enhanced app interactivity and boosting user engagement.
- Built and maintained RESTful APIs and real-time socket connections to support dynamic data and enhance user engagement
- Deployed and maintained Ekofin Mobile app in app store and play store

EKOFIN FULLSTACK DEVELOPER

02.2024 -PRESENT

- Developed a modern web application using Next.js with TypeScript, implementing SSR and SSG for optimal performance; added multi-language support and improved SEO using tools like Semrush, Screaming Frog, and Google Search Console. Also performed web scraping with Python, managed MSSQL databases, and developed high-performance .NET APIs to enhance backend efficiency.
- Created reusable UI components with TailwindCSS, following mobile-first design principles
- Designed and implemented RESTful APIs for seamless client-server communication.
- Deployed and maintained production-ready websites:
 - ekofin.net – Financial services platform 
 - smartinfo.com.tr 

PROJECTS

TRADEHUB

ReactJs ,Nodejs , MongoDB , ExpressJs, Styled-Components

- TradeHub is an e-commerce app that allows users to register, log in, explore products by category, search, add to cart, leave reviews, verify cards, and personalize their shopping experience by adding favorites.

EDUPROTRACK

ReactJs ,Nodejs , MongoDB , ExpressJs, Styled-Components

- EduProtrack is a School Management System that includes Student, Teacher, and Admin modules. It facilitates efficient assignment management and evaluation for teachers, assignment submission for students, and oversight for admins.
